	PLM-MAINT REPAIR BASKET FLTR FILTER MESH		(Square meter)	
PIPELINE MECH-MAINT WK "Supply and fixing of filter mesh of specified size and of specified swg using the material as given in the scope of work on the basket filter element by brazing/ soldering as per the scope of work. The contractor shall quote on basis of square meter area of the filter element mesh and as per the scope attached. The job carried out on each basket filter in detail is as follows, 1. Removal of the existing wire mesh along with the supporting strips of the supplied basket filter elements. 2. Supply and fixing of wire mesh on the external periphery of vertical filter element and the external bottom surface of the basket filters by brazing/soldering as well as spot welding etc. The overlaps of the wire mesh shall be kept maximum 25 mm. The continuous soldering is required at the mesh overlaps so that there shall not be any opening. The tack welding shall be carried out on all the circumferential stiffener rings with mesh at every 90 degree to have proper grip of the mesh with the stiffener ring. 3. Supply and installation of SS metal strips of 15 mm width on the installed wire mesh for strengthening of the wire mesh. These strips shall be continuously soldered around the vertical filter element and shall not be overlapped. These strips to be installed at top, middle and bottom surface of the vertical cylindrical surface of the filter element.

	4. Supply and Installation of SS metal strips of 15 mm width on the installed wire mesh for strengthening of the wire mesh. These strips shall not be overlapped and installed at bottom surface of the filter element by silver soldering. 5. The contractor shall ensure that the SS strips to be installed on continuous basis without any overlaps. The contractor shall also ensure that there shall not be opening through the installed mesh and it should work for excellent filtering of liquid product. 6. Supply and installation of 4 nos. of 6 mm SS square bars of SS on the internal SS stiffener rings vertically from bottom of the stiffener ring to the top of the stiffener ring as per the modifications mentioned in the following drawings by continuous silver soldering. 7. SCOPE OF SUPPLY BY THE CONTRACTOR : All the SS wire mesh and SS strips 15 mm width of required length as per the contract requirement, all the tools tackles, soldering machines/ rods, manpower, consumables etc. are in the scope of the contractor.
