	General Instructions to vendors for e-tendering	
	General Instructions to vendors for e-tendering	Bidder's Response
	<p>General Instructions to vendors for e-tendering</p> <p>1. Interested parties may download the tender from BPCL website (http://www.bharatpetroleum.in) or the CPP portal (http://eprocure.gov.in) or from the e-tendering website (https://bpclproc.in) and participate in the tender as per the instructions given therein, on or before the due date of the tender. The tender available on the BPCL website and the CPP portal can be downloaded for reading purpose only. For participation in the tender, please fill up the tender online on the e-tender system available on https://bpclproc.in.</p> <p>2. For registration on the e-tender site https://bpclproc.in, you can be guided by the “Instructions to Vendors” available under the download section of the homepage of the website. As the first step, bidder shall have to click the “Register” link and fill in the requisite information in the “Bidder Registration Form”. Kindly remember your e-mail id (which will also act as the login ID) and the password entered therein. Once you complete this process correctly, you shall get a system generated mail. Login in to the portal using your credentials. When you log in for the first time, system will ask you to add your Digital Signature. Once you have added the Digital Signature, please inform us by mail to the vendor administrator vendoradmin@bpclproc.in</p>	

Tender title : Procurement of MASS FLOW METER for ALL INDIA LOCATIONS ON ARC BASIS

with a copy to support@bpclproc.in for approval. Once approved, bidders can login in to the system as and when required. .

3.As a pre-requisite for participation in the tender, vendors are required to obtain a valid Digital Certificate of Class IIB and above (having both signing and encryption certificates) as per Indian IT Act from the licensed Certifying Authorities operating under the Root Certifying Authority of India (RCIA), Controller of Certifying Authorities (CCA). The cost of obtaining the digital certificate shall be borne by the vendor. .

In case any vendor so desires, he may contact our e-procurement service provider M/s. E-Procurement Technologies Ltd., Ahmedabad (Contact no. Tel: +91 79 4001 6868 for obtaining the digital signature certificate. .

4. Corrigendum/amendment, if any, shall be notified on the site <https://bpclproc.in>. In case any corrigendum/amendment is issued after the submission of the bid, then such vendors who have submitted their bids, shall be intimated about the corrigendum/amendment by a system-generated email. It shall be assumed that the information contained therein has been taken into account by the vendor. They have the choice of making changes in their bid before the due date and time. .

5.Price bid of only those vendors shall be opened whose Techno-Commercial bid is found to be acceptable to us. The schedule for opening the price bid shall be advised separately. .

6. Directions for submitting online offers, electronically, against e-procurement tenders directly through internet: .

(i)Vendors are advised to log on to the website (<https://bpclproc.in>) and arrange to register themselves at the earliest, if not done earlier. .

(ii)The system time (IST) that will be displayed on e-Procurement web page shall be the time considered for determining the expiry of due date and time of the tender and no other time shall be taken into cognizance. .

(iii)Vendors are advised in their own interest to ensure that their bids are submitted in e-Procurement system well before the closing date and time of bid. If the vendor intends to change/revise the bid already submitted, they shall have to withdraw their bid already submitted, change / revise the bid and submit once again. In case vendor is not able to complete the submission of the changed/revised bid within due date & time, the system would consider it as no bid has been received from the vendor against the tender and consequently the vendor will be out of contention. The process of change / revise may do so any number of times till the due date and time of submission deadline. However, no bid can be modified after the deadline for submission of bids. .

(iv)Once the entire process of submission of online bid is complete, they will get an auto mail from the system stating you have successfully submitted your bid in the following tender with tender details. .

(v)Bids / Offers shall not be permitted in e-procurement system after the due date / time of tender. Hence, no bid can be submitted after the due date and time of submission has elapsed. .

(vi)No manual bids/offers along with electronic bids/offers shall be permitted. .

7.For tenders whose estimated procurement value is more than Rs. 10 lakhs, vendors can see the rates quoted by all the participating bidders once the price bids are opened. For this purpose, vendors shall have to log in to the portal under their user ID and password, click on the “dash board” link against that tender and choose the “Results” tab.\ .

8.No responsibility will be taken by BPCL and/or the e-procurement service provider for any delay due to connectivity and availability of website. They shall not have any liability to vendors for any interruption or delay in access to the site irrespective of the cause. It is advisable that vendors who are not well conversant with e-tendering procedures, start filling up the tenders much before the due date /time so that there is sufficient time available with him/her to acquaint with all the steps and seek help if they so require. Even for those who are conversant with this type of e-tendering, it is suggested to complete all the activities ahead of time. It should be noted that the individual bid becomes viewable only after the opening of the bid on/after the due date and time. Please be reassured that your bid will be viewable only to you and nobody else till the due date/ time of the tender opening. The non availability of viewing before due date and time is true for e-tendering service provider as well as BPCL officials. .

9.BPCL and/or the e-procurement service provider shall not be responsible for any direct or indirect loss or damages and or consequential damages, arising out of the bidding process including but not limited to systems problems, inability to use the system, loss of electronic information etc. .

In case of any clarification pertaining to e-procurement process, the vendor may contact the following agencies / personnel: .

Tender title : Procurement of MASS FLOW METER for ALL INDIA LOCATIONS ON ARC BASIS

SR.NO.	SPECIFICATIONS / REQUIREMENT	VENDORS OFFER
1.	Application: To measure the mass flow rate of MS/ HSD/ SKO/ Naphtha during custody transfers in pipelines.	
2.	Measurement Standard: API, Manual of Petroleum Measurement Standards Chapter 5 - Metering Section 6 - Measurement of Liquid Hydrocarbons by coriolis Meters.	
3.	Operating Conditions:	
3.1	Flow Rate operating : Refer Data sheet	
3.2	Pressure Operating : Refer Data sheet	
3.3	Operating Temperature : 5°C (Min); 50°C (Max)	
3.4	Density/Viscosity/other parameters : Please refer BIS Standards 15-1459 for SKO, IS-1460 for HSD, IS -2796 for MS & Data sheet	
3.5	Corrosive Components: 2500 ppm (Max) of sulphur and substantial amount of caustic is present in Hydrocarbon.	
4.	Process connections: Flanged ends 150# / 300# as per ANSI B 16.5 (Refer Data sheet - Annexure-B)	
5.	Installation Location: The proposed mass flow meter shall be installed on horizontal pipe line section which is at 0.3M-1.2M elevation above ground, supported on concrete sleepers / Structural Supports and the mass flow meter construction/design shall comply with the installation location aforesaid. The Bidder shall provide a drawing of the recommended installation arrangement with the piping modified proposed, along with the bid.	
5.1	The flow meter should be bi directional	
5.2	Only one meter on the pipe line.	
6. 6.1	Materials of Construction: Coriolis Mass flow sensor (Wetted Parts): The manufacturer to decide a suitable material which resists the corrosive components Sulphur and Caustic, present in the hydrocarbons, as mentioned clause 3.5 above and compatible with the operating conditions and the media.	
6.2	Housing of the Flow Transmitter ; Epoxy coated die-cast Aluminum	
7. 7.1	Accuracy of the Mass Flow Measurement and factory calibration: Maximum allowable error: ± 0.1 % of the reading Density Accuracy: ± 0.0005gm/cc Volumetric flow error:± 0.1 % of the reading	

Tender title : Procurement of MASS FLOW METER for ALL INDIA LOCATIONS ON ARC BASIS

7.2	Repeatability & Linearity: $\pm 0.05\%$ of the reading	
7.3	<p>Factory Calibration: The Coriolis Mass Flow meter shall be calibrated at a calibration rig which is accredited to ISO/IEC 17025. The calibration method shall be based on gravimetric measurement with weighing container.</p> <p>The calibration method as TSM (Transfer Standard Method) in accordance with ISO 17025 will be acceptable in case if vendor submits a letter from its OEM.</p>	
7.4	No. of calibration / test points: 5	
7.5	<p>ISO/IEC 17025 accreditation: A copy of the ISO/IEC 17025 accreditation certificate of the calibration facility / calibration rig shall be submitted along with the technical bid. (Calibration rig accuracy shall be 3 times better than the specifications)</p> <p>Note:</p> <p>(i) Vapour eliminator are essentially required to provide the accuracy mentioned above the vendor shall provide the same within the quoted rate.</p> <p>(ii) Successful Vendor to satisfy himself with respect to external vibrations that may affect the accuracy of the mass flow meter before installation. Suitably modifications required in piping supports may be suggested before installation so that accuracy of the meters is not affected.</p>	
8.	Flow Transmitter/display Unit	
8.1	Type : Integrally mounted on the sensor unit Remote mount transmitter (30 M apart from Sensor unit) Signal cable as required to be provided by vendor along with suitable SS cable glands (Double compression type, FLP) at both ends.	
8.2	Display: Backlit LCD for clear visibility during poor illumination levels	
8.3	<p>Process variables available on display</p> <p>8.3.1 8.3.1. Mass flow in engineering Units</p> <p>8.3.2 8.3.2. Volumetric flow in engineering units</p> <p>8.3.3 Density</p> <p>8.3.4. Process Temperature</p>	
8.4	Reset counter and cumulative totalizer. The Flow Transmitter/Display Unit shall be equipped with 8 Digits Cumulative Totalizer & 5 Digit Reset Counter with programmable decimal point. The reset counters shall keep track of total amount of mass transferred during each product transfer and can be viewed, started, stopped and reset through front panel controls. The cumulative totalizer shall track the same mass as reset counter but reset facility shall not be allowed.	
8.5	Self-Diagnostic functions: The Flow Transmitter/display Unit shall be capable of performing self-diagnostic tests on hardware and displaying diagnostic messages.	
8.6	<p>Output signals</p> <p>8.6.1. The flow Transmitter/display unit shall have</p>	

Tender title : Procurement of MASS FLOW METER for ALL INDIA LOCATIONS ON ARC BASIS

	<p>(1) Essential Requirement-</p> <p>(a) 1 No. Analog (4-20 MA) output</p> <p>(b) MODBUS RTU serial output</p> <p>(c) 1 No. Pulse output</p> <p>(d) In-built API Tables (See Note-1 Below)</p> <p>(2) Optional Requirement-</p> <p>(a) High Flow Alarm</p> <p>(b) 1 No. Analog (4 20 MA) output without HART communication</p> <p>Note-1: The bidders are required to provide flow computer in case if inbuilt API tables are not available in the Mass flow meters.</p> <p>Note-2: All the outputs specified above shall be custody transfer approved</p> <p>8.6.2.The Flow Transmitter/Display unit shall be capable of generally active pulse output which can be configured to indicate the mass transferred. Number of pulses generated for a unit mass transferred, shall be user configurable</p>	
8.7	<p>Communication functionality:</p> <p>The mass flow meter, calibrated remotely using a Hand Held Communicator from any wiring termination point of the output signal loop. The communication protocol shall be HART (Highway Addressable Remote Terminal); A compatible hand-held communicator unit (per location) could be configured shall be quoted separately.</p> <p>Hand held Hart communicator (intrinsically safe) is mandatory requirement.</p>	
8.8	<p>Surge Protection: The Mass flow Meter Hardware shall be protected against surges, transients induced either by switching of heavy electrical loads or lighting. Compatible surge protectors recommended by OEM for signal and power supply, with necessary mounting accessories shall be provided. The surge protector shall be designed and tested as per the requirements of BS EN 62305 or IEEE C62.41.</p>	
8.9	<p>Ingress Protection Class : Ingress Protection Class as per IP65 as per IEC/N60529E</p>	
8.10	<p>Electrical Connection: 0.5 Inch - 14 NPT or M20</p>	
9.	<p>EMC Compliance :</p> <p>The mass flow shall comply with generic immunity standards EN 50081, EN 50082 and EN 55011 for emission.</p>	
10.	<p>Hazardous Area Certification:</p> <p>shall have approval from ATEX 11 2G Exd 11AT6 and PESO/CCOE for use hazardous area, zone 1</p>	
11.	<p>Power supply available at the installation:</p> <p>240V, 50 Hz. Power supply & UPS to be provided by BPCL</p>	
12.	<p>Environmental Conditions:</p>	
12.1	<p>Ambient temperature: 5&deg;C - 50&deg;C</p>	
12.2	<p>Relative Humidity: Maximum 95% non-condensing</p>	
13.	<p>Quality Standard/Accredited Calibration Facility:</p>	

Tender title : Procurement of MASS FLOW METER for ALL INDIA LOCATIONS ON ARC BASIS

		The Mass Flow Meter shall be factory calibrated at a calibration rig which is accredited by the national metrology authority of the manufacturing country in accordance with ISO/IEC 17025, General requirements for the competence of testing and calibration laboratories. A copy of the ISO/IE 17025 accreditation certificate shall be submitted along with the bid.	
14		Custody Transfer Approvals:	
14.1		The MFM shall have custody transfer approvals (for mass Flow measurement & volumetric flow measurement) as per OIML R117 from OIML approved Laboratories (e.g. NMI/PTB etc.)	
14.2		The MFM shall also have custody transfer approvals from W&M, India for Mass Flow measurement & volumetric Flow Measurement	
14.3		Each MFM shall be calibrated at FCRI, Palghat for custody transfer applications as part of original order.	
.		The meters will be used for custody transfer applications hence as per the Dept of Legal Metrology requirement Hardware & Software lock is mandatory. This feature will enable that no meter tampering is possible at site.	
15		Spares availability & Warranty: The mass flow meter shall be a proven design and availability of spares shall be guaranteed for at least 10 years period. The supplier shall guarantee that the design engineering and equipment supplied shall be free from defects and shall confirm to specification. All defective material shall be replaced free of charge during warranty (comprehensive) and comprehensive AMC	
16		Documentation and operation and maintenance manuals:	
16.1		Product catalogues containing technical specification, options, features and functions, dimensional drawing, installation arrangements with proposed piping modifications, ISO/IEC 17025 accredited certificate for the calibration rig and hazardous area certification from PESO/CCOE of the quoted model shall be submitted with the bid.	
16.2		Operation and maintenance manuals containing installation procedures terminal connections, wiring details, spare part lists etc. shall be supplied along with the equipment delivery.	
16.3		The mass flow meter shall be calibrated at a calibration facility accredited by the national metrology authority of the manufacturing country in accordance with ISO/IEC 17025, prior to shipment and certified 5 point calibration test report shall be submitted along with equipment delivery. All literature shall be in English Language.	
17.		SENSOR	
		a) Sensor Type: Vendor to specify	
.		b) Service: MS/HSD/SKO/Naphtha	
.		c) Volumetric flow range: Refer Data sheet - Annexure-B	
.		d) Operating flow: Refer Data sheet - Annexure-B	

Tender title : Procurement of MASS FLOW METER for ALL INDIA LOCATIONS ON ARC BASIS

.	e) Maximum pressure: Refer Data sheet - Annexure-B	
.	f) Process temperature: Refer Data sheet - Annexure-B	
.	g) Density of fluid (Range): Refer Data sheet - Annexure-B	
.	h) Viscosity: Refer Data sheet - Annexure-B	
.	i) Line size: Refer Data sheet - Annexure-B	
.	j) Process connection: RF Flanged as per ANSI B 16.5	
.	k) Accuracy: +/- 0.1% of reading or better for mass flow	
.	l) Repeatability/Linearity: +/- 0.05% of measured value or better	
.	m) Material of construction of tube: SS316 or better	
.	n) MOC of flanges, reducer, expander, nuts, bolts etc: SS304 or better Matching CS flange and SS Stud & bolts to be provided along with the mass flow meters	
.	o) Max. allowable diff. pressure •Max. Allowable Diff. Pr. across MFM at Normal Flow rate: 0.5kg/cm2g•Max. Allowable Diff. Pr. across MFM at Max. Flow rate: 1kg/cm2g Note 1: In order to meet the above clause, vendors are allowed to offer Mass Flow Meters more than the line sizes specified by us. Note 2: Mass Flow Meter performance parameters (i.e. accuracy, repeatability, linearity etc.) shall remain valid for the entire operating flow range (minimum to normal to max flow rate) specified.	
.	Density Accuracy : 0.0005 gm/cc (Factory Calibration)	
.	Density Repeatability: 0.00025 gm/cc	
.	•Volumetric Accuracy: +/- 0.1% of reading or better for volumetric flow rate	
.	Repeatability: +/-0.05% of measured value or better	
.	Rangeability- 1:5 minimum.	
.	TRANSMITTER a) Power supply: 240 V AC @ 50Hz	
.	.b) Output: RS485 over MODBUS and 4 to 20 mA with HART communication (1) Essential Requirement- (a) 1 No. Analog (4-20 MA) output (b) MODBUS RTU serial output (c) 1 No. Pulse output (d) In-built API Tables (See Note-1 Below)	

Tender title : Procurement of MASS FLOW METER for ALL INDIA LOCATIONS ON ARC BASIS

	<p>(2) Optional Requirement-</p> <p>(a) High Flow Alarm</p> <p>(b) 1 No. Analog (4 20 MA) output without HART communication</p> <p>Note-1: The bidders are required to provide flow computer in case if inbuilt API tables are not available in the Mass flow meters.Note-2: All the outputs specified above shall be custody transfer approved</p>	
.	c) Local display: LCD	
.	d) Zero and span adjustment: Should be possible with and without HART communicator	
.	All standard accessories such as flanges, reducer, expander, nuts, bolts and any other accessory not mentioned but required for completeness should be supplied along with the instrument.	
.	<p>Notes:</p> <p>1) Detailed technical catalogue / literature should be sent along with the offer.</p>	
.	2) All test/calibration certificates along with instruction manual/Operation manual in English should be provided at the time of supply.	
.	3) A make shall be considered as approved only if Custody Transfer approval as per Clause 14 are available.

TECHNICAL SPECIFICATIONS OF MASS FLOW METERS	VENDOR'S CPNFORMATION
<p>TECHNICAL SPECIFICATION FOR FLOW COMPUTER</p> <p>1.Type The flow computer shall be single stream Microprocessor based, with alphanumeric digital display and data entry keyboard. Flow computer electronics shall be protected from industrial interferences; shock and vibration proof and shall have low power supply consumption.</p> <p>Flow computer CPU shall be with minimum 32/64-bit microprocessor with a separate math coprocessor, 16 MHz operation, real time clock and RAM battery backup.</p> <p>Flow computer shall have RAM -512KB expandable upto 1MB, EPROM -1MB expandable up to 2MB.</p> <p>2.Mounting: Flush panel mounting Flow computers shall be kept in an air conditioned room / mounted on panel at BPCL control room. Vendor shall supply full particulars and drawings for the size of cut-outs required. Final drawings shall contain mounting details.</p> <p>3.Enclosure: General purpose</p> <p>4.Power supply: 230 VAC +/- 10%, 50Hz +/-2% UPS for flow computers.</p> <p>BPCL will provide 230 V &plusmn; 10%; 50 Hz, &plusmn; 2%, Single Phase, UPS power supply at single point at BPCL control room.</p> <p>24VDC for powering interface electronics components / isolators / active barriers / and field transmitters shall be provided by the owner. Vendor shall furnish the power consumption for each power supply level in order to size the required power feeder by the purchaser. Connection / termination details shall also be furnished.</p> <p>5.INPUT SIGNAL CAPABILITY One flow computer per location with 04 nos of channel to shall cater minimum 04 nos of mass flow meters, temperature transmitters and other associated instruments.</p> <p>The two wire transmitters (Pressure & Temp. Tx) shall be provided 24 V power supply by the Flow computer & shall be part of intrinsically safe circuits.</p> <p>6.Keyboard capability</p> <p>The data entry keyboard shall have the provision to enter the following:</p> <p>(a)Pressure and temperature base factor. (b)Liquid density and scaling factor. (c)Flow, pressure, temperature and density values and give compensated flow for any external conditions including at 15 deg C.</p> <p>(d)Flow computer shall have the facility to enter report headings, frequency timings and parameters to be printed. the printout shall be provided for flow rates, integrated flows, alarms and also for the various parameters to which the flow computer has access. (e)The flow computer shall have provision to enter default values of all inputs, low / high alarms for all inputs and shall be user configurable. The flow computer shall use the default values in case of any input goes beyond low/high limit. (f)Other standard features available.</p>	

7. Output Capability

8. Flow computer outputs shall be isolated. Outputs shall be galvanically/optically isolated otherwise suitable active isolators shall be provided for each output to be mounted in the Air conditioned Room.

9. Following minimum outputs shall be provided:

- i) Two 4-20 mA isolated signal outputs for corrected volume flow rate and mass flow rate
- ii) Four nos. Digital outputs (potential free) for audio-visual alarm/ trip command from other field instruments. The Flow computer shall have provision to set the alarm settings of such alarms outputs.
- iii) Four Nos. digital inputs for status indication of automated valves of the facility.
- iv) Flow computer shall communicate with the Host (LDS server) in one of the following manner-
 - a. Ethernet over TCP-IP
 - b. Ethernet over OPC.

10. Computational Capability

- a) The flow computer shall have the functionality of time stamping the input process variables (from the field instruments).
- b) Calculate stream mass flow, utilizing gross volume flow and density
- c) Compensate gross each stream volume for effect of pressure and temperature, to obtain net stream reporting volume at 15 deg C and 1.01325 bar absolute.
- d) Computation of volume flow rate at standard, normal or user defined base conditions.
- e) Liquid meter flow computers shall have calculations for temperature compensation as per API 2540 and ASTM D-1250, pressure compensation as per API 11-2-1 & API 11-2-2, and API Chapter 5.6, measurement of Liquid hydrocarbon by coriolis meters
- f) K-factor liberalization shall be provided for the Stream flow computers.
- g) Display all measured and calculated variables.
- h) Output alarm messages to the station control system (PLC) for logging and control.
- i) Permanently display the totalised quantity (corrected volume, mass flow) with sufficient digits to accumulate three months maximum flow without roll-over.
- j) Display on demand the totalised daily flow (reset to zero daily).
- k) Watchdog timer to monitor internal circuits and to signal to LDS server via hardwiring, when a fault is detected. This shall enable the LDS server to detect the fault.
- l) Store in memory the applicable tables detailed in ASTM D1250 (or the appropriate, formula and procedures), for use in compensated volume during normal throughput flow.
- m) Generate an alarm when flow counting is detected but the meter stream is not selected (i.e. offline).
- n) Manual entry of meter calibration factors should be time stamped. The flow computer should also hold the previous meter calibration factor used.
- o) Compile flow data in agreed format for generation of standard and user defined reports and feed this on demand from station control system.

11. Standards Used:

For the above, applicable standards are:

(i) API 2540 / ASTM D-1250 for Temperature compensation and density correction.

(ii) API MPMS Chapter II for Pressure correction

(iii) IP/ IEC 252/ 76 Integrity class A or B for pulse security

(iv) API Chapter 5.6, measurement of Liquid hydrocarbon by Coriolis meters

12. Engineering Units

Flow rate - m³/hr

Mass Flow rate - Tonnes/hr

Pressure - kg/cm²g

Temperature - deg C

13.Memory Type

Non-Volatile

14.A/D and D/A Converter

Calculation accuracy shall be better than +/- 0.05% of full scale including linearity, hysteresis, repeatability and resolution. Accuracy for analog inputs to be minimum 0.05%, while for analog output accuracy should be +/- 0.1% of FSD.

15.Displays/ outputs and reports to station control room PLC shall be configurable type and flow computer shall have following display capability:

The flow computer shall have the capability to display any two of the following parameters, at a time:

Modbus Output

- 1)Mass flow rate
- 2)Volume flow rate@ 15 deg C as per API
- 3)Density @ ambient or process temperature
- 4)Corrected Density @ 15 deg C as per API
- 5)Corrected volume@ 15 deg C as per API
- 6)Weighted Average density
- 7)Weighted Average Temperature

16.Display Type

(a)Alphanumeric LCD display

(b)LED/LCD display for user definable parameters.

17.Diagnostics

Flow computers shall have elaborate and sufficient online diagnostics to ascertain accurate and proper functioning of the flow computer. Results of diagnostics/checking shall be displayed. Facility for easy testing of the accuracy shall be provided. Provision for high and low limit check for each input, sensor break, saturation and alarms shall be provided.

18.Meter factor in the flow computer

- a)The flow computer shall have meter-proving capability with K factor (meter factor) adjustment, from the keyboard as per the API guidelines.
- b)Flow computer shall have provision to have different K factors for each product.
- c)Flow computer shall automatically change the K factor, depending on the density of the product for calculation, as specified below.
- The total range of density is 600-900 kg/m³

d)Flow computer shall have K factor locking facility with sealing for custody transfer approval.

e)Flow computer shall have audit trail feature for the detailed historical records of the changes done in the flow computer parameter. Audit trail shall be accessible through higher-level password only.

f) Six points calibration for 10% to 100% of meter maximum at normal pressure shall be configured in the flow computer for the respective flow meter as per the calibration at time of supply.
During detail engineering vendor shall furnish flow computer engineering / configuration data sheets for BPCL review. Vendor shall furnish engineering ranges, pulse count etc. for each flow computer as applicable for each corresponding field instrumentation.

19. Scan Processing Time:

- a) The interval between computer readings of Process variables shall not exceed 1 sec
- b) The interval between each cycle for computation of instantaneous flow rate and totalized flow shall be less than 1 sec.
- c) Algorithm and rounding off error for computation shall be within +/- 0.001% of computed value.

20. Interface electronics and accessories

Vendor shall supply all interface electronics i.e. isolating IS barriers for the field instrumentation signals and active isolators for all 4-20 mA outputs. Interface electronics shall be suitable for DIN rail mounting inside owner supplied control panel.
If required, a wall/ back of panel mounted enclosure is to be provided by vendor to house above interface electronic devices.

In addition to the above the flow computer shall have the following features:

- a) Flow computers shall have online "configuration software" and the calibration method will be software driven.
 - b) Flow computers shall be having stored report and data for archiving.
 - c) Flow computers shall have multi point (Min. 6 points) meter Linearisation.
 - d) Flow computers shall have built in proving function in EPROM.
- Vendor shall furnish FAT procedure for checking of functionality and configuration of the LDS System with flow computer.

Approved Makes: Thermo/ Daniel/ OMNI / FLOWBOSS (EPM) / SOLARTRON / BRISTOL-BABCOCK

21. Note: The cable Supply and laying between transmitter (in field) and Flow computer (in control room) will be done by BPCL. The Cable Glanding (including supply of cable glands at both ends) and termination at both ends shall be done by the bidder.
